

## Features introduced in 18.2

# Spotlight 🕫

**Import tasks from the Oracle Prime Projects Tasks app for lean scheduling in P6.** Tasks are displayed as steps assigned to activities in integrated projects. Add columns to Activities views and the Steps detail window to see task information from Prime, including start and completion dates. Add columns to highlight activities with tasks outside the activity dates; activities that are completed but have incomplete tasks; and activities that are not completed where all the assigned tasks are completed.

**P6 18 continues the process of removing Java-based applets from the application in exchange for pages written in HTML5.** The HTML-based pages load faster and do not require additional plug-ins. In some cases, the HTML-based pages offer the same or very similar functionality, while other pages have been redesigned. Common elements of new HTML pages are documented below, using the Activities page as an example.

➢ Watch a <u>video</u> demonstrating this feature.

1: Use the Grid to add, edit, and view items on the page, such as resources.

**2**: Select or hover over an item, and the <u>Row Actions</u> menu becomes available with functions that can be performed on that item. For example, use the menu to cut, copy and paste resources.

**3:** Use <u>Detail Windows</u> to view and edit the properties of the selected item in the grid.

**4:** The <u>Toolbar</u> contains various buttons and menus. Features common to many pages include <u>Print</u> and view <u>Full Screen</u>.

**5:** The Toolbar often contains an <u>Actions</u> menu that offers various functions for the page. For example, on the Resource Administration page, the menu contains options to import from Microsoft Excel.

**6**: Many pages also contain an option to <u>Customize View</u>. Use this to access the column, filter, grouping and other settings that affect the appearance of the page.

#### The following HTML5 page enhancements were added in P6 18.1:

- Progress Spotlight is added to the Activities page.
- Ability to cut, copy and paste multiple WBS nodes is added to the Activities page.
- Ability to import and export views is added to the EPS and Assignments pages.

## ✓ Key Changes

**Create multiple user views on the EPS, Activities, Resource Assignment, and Project Assignment pages.** For example, create multiple user views for departments who need access to consistent views of information. Only the creator can edit the view and only those assigned can display it. Cut/copy existing User views to the Multiple Users category to allow other users to access them, or cut/copy existing Global views to Multiple Users to restrict access or prevent the views from being modified.

### Other Enhancements

**Performance Percent Complete Field Based On Labor Units.** The Performance % Complete - Labor Units field shows the percentage earned value of the budget at completion as calculated from labor units.

**Import and Export Location with Projects.** When you import and export Projects using the Primavera XML format, location data is included in and retrieved from the XML file.

**Performance Enhancements.** P6 Web Services ReadActivities operation is faster in customizing the Activities Page view when the open project contains a large number of activities.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications applications.

This software or hardware and documentation may provide access to or information on content, products and services from third-parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.
